MEANING

SINCE 1986...

BRINGS MEANING TO LIFE!

Byart Group is a product of a durable, aesthetic and minimalist endeavor. It redesigns bioclimatic pergola, awning and glass systems with an inspiration from the constructive, analytic and universal energy of the art, and delivers solutions for each season condition.

Byart Group is operating in a **7.300 sqm production facility** with the knowledge and experience it gained from its **30-year-old sector experience**. It has expanded its domestic and overseas production with the facilities it has. It reached to its professional structure thanks to the solutions it brings to the living spaces.

Byart Group meets all customer needs by offering a wide range of products that are covered under the quality and reliability of the **SmartRoof, VertiGlass and PergoLine** brands. It extends its portfolio with its professional management team, experienced marketing department and satisfied domestic and international customers.

Byart Group provides services through distributors abroad. It exports forty percent of its total capacity, mostly to **Europe**; more than 40 countries in continents.

BYART TECHNOLOGY

Byart Group manufactures in a modern and technologically integrated production facility with a 7.300 sqm closed area.

Byart keeps its tabs on the technological advancements and gives weight to development and innovation all the time. It uses the latest technology pieces developed by leading manufacturers that comply to the international standards.

QUALITY POLICY

Quality means satisfying the customer's expectations in terms of products and delivered services. Quality is not confined to those departments which come into direct contact with the customer. It is a key principle for all employees of Byart as they go about their work, whether in production, sales, accounting, customer service, R&D or purchasing. Every employee contributes to quality in their own field.

COMPANY'S HISTORY

1986

FOUNDATION

Due to the industrial conditions at the time, we made our debut in the sector by offering installation and assembly services to companies that were already producing tents. But also by presenting to our customers the products which we saw the need during the assembly phase and which we subsequently manufactured.

1990

START OF PRODUCTION

We started our first production activities and offered our customers the products we created with parts and accessories that we purchased from manufacturing companies.

1995

WE ARE OPENED TO THE WORLD

We have opened up to the global market, and started to work with companies that produce accessories for the awning sector, especially in Italy. We have obtained the concessions for the distribution of motors, fabrics and the manufacture of awning in Turkey. In a short time, we have established a marketing network for the production projects of technological tents and semi-finished awning systems all over Turkey.

2000

EXPANSION OF OUR NETWORK

We have established production departments in all areas of the sector from iron construction to aluminum construction and textile fabric processing. We have developed our sales and marketing network in many regions and provinces of Turkey.

2005

OPENING OF OUR FACTORY

We opened our factory with a production area of 7300 m². We have successfully installed hundreds of the products we produce in thousands of commercial spaces and residential projects.

2010

START OF R&D

We have formed our R&D team to produce more efficient and permanent solutions. We have designed and manufactured pergolas and bioclimatic pergola systems with the significant structural changes that we have developed.

2015

WE ARE ALL OVER THE WORLD

We supply our own production of parasols, pergola, bioclimatic pergola and vertical glass systems worldwide; We offered sales and marketing services as well as assembly and application possibilities.

2020

WE ARE GROWING

We have started the construction of our new factory. Under the VertiGlass, PergoLine and SmartRoof brands and we export our products that we produce.

F ADDS COMFORT TO LIFE!

Byart Group renowned for the most modern, highest technology facilities and wide product range offers services in 9600 m² closed area and with an expert staff. Byart Group adopted quality, fast and efficient manufacturing principles and offers technological and architectural innovations based on customer demands.

Byart Group considers customer demands and develops 1000 projects per year. R&D team prepares prototypes for product development depending on field and factory briefs and the team is in constant contact with the mounting-manufacturing team.

Byart Group cares for development and innovation and uses the top-line components developed with the most advanced technology by leader manufacturers operating in the international arena.

Byart Group products are constantly tested in the laboratory and on the field. All the products are tested for snow load, wind and isolation by international institutions and awarded with durability reports.

BRINGS COMFORT TO LIFE!

SmartRoof bioclimatic pergola makes all the difference in the pergola systems, as it has been developed specifically to be an indispensable architectural piece to your living spaces.

Besides being durable and long lasting, SmartRoof provides heat and water insulation thanks to its water gutters and special gaskets. It prevents heat loss with polyurethane filling in panel cavities. It also provides sound insulation and reduces heating costs in the cold weathers.

SmartRoof Bioclimatic Pergola systems have integrated lightings that bring an elegant, modern and sophisticated look to the outdoor space. It makes life easier with its wide range of products with straight or inclined structures.

Shell Plus has an oval structure that can be projected up to 1000 cm to create wide open spaces for the professional enterprises. It is resistant to all weather conditions with no need for any additional carrier. The secret that lays behind its ability to be used in a wide space without any carrier is the technology that supports it. It is appropriate to cover the side areas with folding and heat-insulated aluminum joineries. Pergola Systems use blackout fabric for protection against the sun, rain and wind. It is also flame resistant. Therefore business owners chose it for these functional solutions.
